Project Assignment PS03 – Status

What is the status of your project?

How much earned value have you accrued this week?

- What value was provided (EV) by completed work packages?
- How much effort was planned for each work package (PV)?
- How much effort was expended on each work package completed (AC)?

What risks are you tracking? What is the status of each risk?

- Pay particular attention to items on the critical path!

Be prepared to discuss your team's status in class and respond to questions about your progress.

- Prepare your status report as a PowerPoint presentation.

Grading Rubric

Start your status with a single slide highlighting whatever you think your audience needs to know, 20 points

Status should be based on earned value chart, 50 points

Risk status is NOT just a restatement of the risk – what has happened with respect to the risk since the last report? 30 points

Note that you should report progress including all work done on your project to this point in time, including doing your paper summaries, writing the outline, writing/revising your plan, etc.
