SE 4381, Software Project Planning and Management
Team Assignment T05 – Individual Summary

Select a publication on the topic for your project and summarize it. The summary should be 1-2 pages long (double-spaced).

This is an individual assignment. Coordinate with your teammates to ensure there is no duplication of publications.

The publication should be one of the books or peer-reviewed papers that you plan to include as references in your project. A peer-reviewed paper is published in a journal, such as

       IEEE Transactions on Software Engineering
       IEEE Software
       Communications of the ACM
       ACM Transactions on Software Engineering and Methodology
       ASQ Software Quality Professional
       Information and Software Technology
       Empirical Software Engineering

or in a conference proceedings, for conferences such as the International Conference on Software Engineering.

This will not cover all of the publications used on your project, but will cover a significant percentage of them. It provides an intermediate point on writing your report… and the only one that will be checked.

Grading Rubric

Less than ½ page, -20 points

More than two pages, -20 points

Include a proper reference to the publication, 20 points

Reasonable summation of interesting points, 40 points
